DETAILED ACTION

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 8/10/06, Steven Shaw requested an extension of time for one MONTH(S) and authorized the Director to charge Deposit Account No. 20-068 the required fee of \$120 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Referring to claim 1, delete "(3) if the hardware backoff counter is busy, then: generating a backoff time for the kst traffic category: "

Replace with "(3) if the hardware backoff counter is busy, then: generating a backoff time for the first traffic category:"

Referring to claim 17, delete "thebackoff" and replace with " the backoff".

Art Unit: 2616

Referring to claim 28, delete “moving a backoff counter value and a message from the selected backoff counter to the hardware backoff counter” and replace with “moving a backoff counter value and a message from the selected backoff counter to the hardware backoff counter”

Referring to claim 35, in the last limitation delete “ a select and enqueue transmitb eunit coupled to the coupled to the memory” and replace with “a select and enqueue transmit frame unit coupled to the memory”

Allowable Subject Matter

3. Claims 1, 3-40 are allowed. Claims 22-40 were previously allowed in the final rejection please refer to the final rejection for details. The closest prior art is Young (U.S. Patent No.: 6,965,942). Young teaches method for implementing a backoff counter by first determining the state of the hardware backoff counter and if the hardware backoff counter is in the process of counting down or performing a procedure determined the state of the medium and if the medium is idle then decrementing a value in the hardware backoff counter and if the value is equal to zero then allowing transmission to occur and if the communications medium is busy, then updating a value in each backoff counter per col. 7 lines 11-47.

4. The following is an Examiner's statement of reasons for allowance:

Claims 1, 3-21 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including:

(4) if the communications medium is busy, then updating the values in each virtual backoff counter; selecting a message from a traffic category with a smallest backoff counter; initiating a
